REF: Weeks Bay Seawall Phase III
EverComp 26.1 FRP Sheet Pile Seawall
State of Alabama, Department of Conservation and Natural Resources
Fairhope, AL
Project No. 5-L-425

Dear Mr. Hazenberg,

I am the Project Engineer familiar with the above referenced project.

With the design assistance of Everlast Engineers, we let the project in April of 2010 to replace our existing deteriorated concrete panel walls. The design utilized 30 feet long sheets of EverComp 26.1 FRP composite sheet piling and 35' long timber face piles for support and eliminated the need for traditional tie-backs and deadman.

The sheets were installed in the fall of 2010 by Walter's Diving & Marine and to date we are highly satisfied with the product. Hence, we continue to evaluate the use of your product on some of our upcoming projects.

Sincerely,

A handwritten signature in black ink that reads "Todd Mize".

Todd Mize
